ETI Automation

CONVEYOR

Durable, Reliable Systems That
Move Your Business

ENGINEERED FOR EFFICIENCY. BUILT TO LAST.

With over 25 years of proven experience, ETI Automation is a trusted leader in designing, manufacturing, and integrating premier conveyor systems and material handling solutions. We are your strategic partner, dedicated to solving the unique challenges of modern industry. Our solutions are engineered for maximum efficiency, reliability, and performance, trusted by over 65 companies around the world to drive their production forward.

Key Pillars:

- ✔ 25+ Years of Expertise: Proven industry leadership and technical knowledge.
- ✔ Custom Engineering: Solutions are not just sold; they are designed specifically for your unique process.
- ✔ Quality & Reliability: Built to last, our systems ensure you minimize downtime and maximize output.
- ✔ Industry-Specific Expertise: We understand the unique demands of your industry, from hygienic food-grade requirements to robust automotive assembly.

CONVEYOR

Automated system that moves materials and goods from one location to another.

**PVC/PU Conveyor
Belts**

**PU Round and PU V
Belts**

**Teflon/PTFE
Belts**

**Grooved /Sprocket
Driven Rollers**

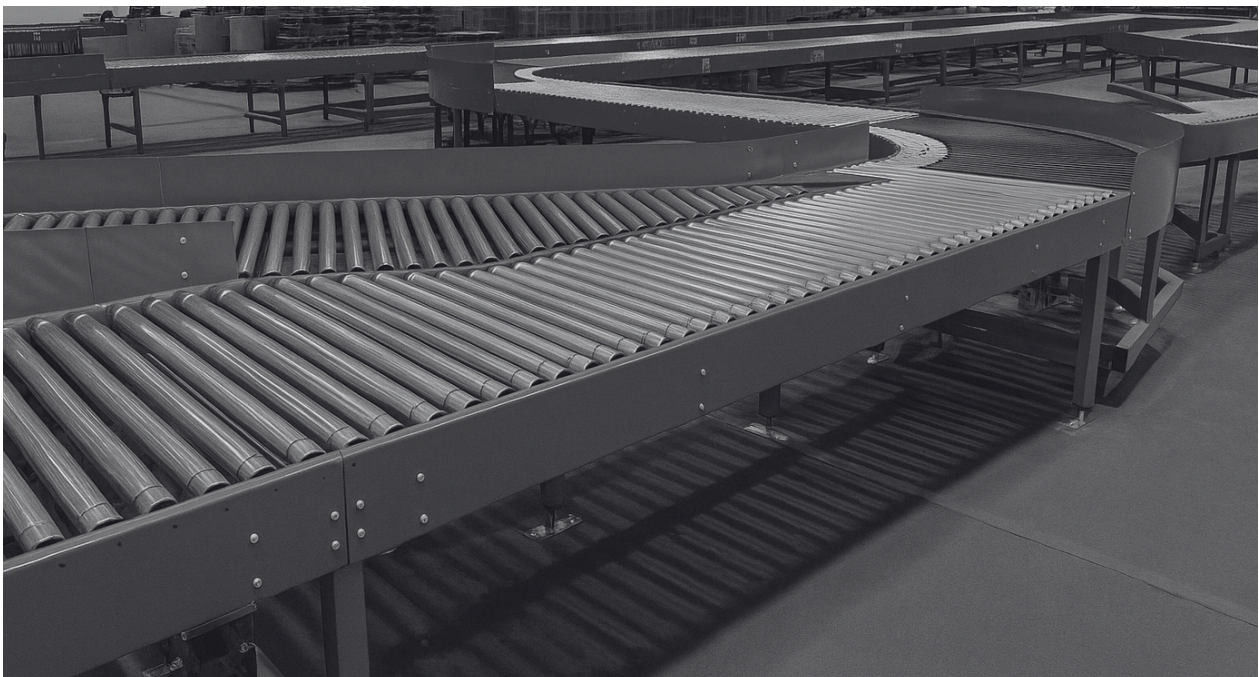

Slat Chain

ROLLER CONVEYOR

Roller conveyors are an essential material handling solution, designed to enhance material handling efficiency and streamline your workflow. They offer versatile configurations, including powered, non-powered, and flexible options, capable of handling a variety of loads from light to heavy, granular to flat, and packaged.

At ETI Automation, we are committed to providing you with the highest quality roller conveyors, tailored to meet your unique needs.

> PVC BELT CONVEYOR

Redefining material transport for a wide range of products.

ETI Conveyor provides an extensive selection of PVC Belt Conveyors to meet the diverse needs of various industries. We offer a wide variety of standard, cleated, and specialty belt solutions.

Our team of experts is dedicated to working with you to create custom solutions that address your specific needs, material characteristics, and facility layout, ensuring seamless integration into your operations.

> OVERHEAD CONVEYORS SYSTEMS

Flexible, cost-effective, and innovative engineering to maximize your floor space.

The primary advantage of overhead conveyors lies in their ability to free up valuable floor space. By utilizing overhead space, they allow for a more open and efficient work environment, reducing clutter and improving safety. Our system is a testament to our commitment to innovation, quality, and customer satisfaction.

> PVC/PU CONVEYOR BELTS

We provide a wide range of PVC (Polyvinyl Chloride) and PU (Polyurethane) conveyor belts, manufactured using the latest technology for specific applications including cleats and paper-top belts.

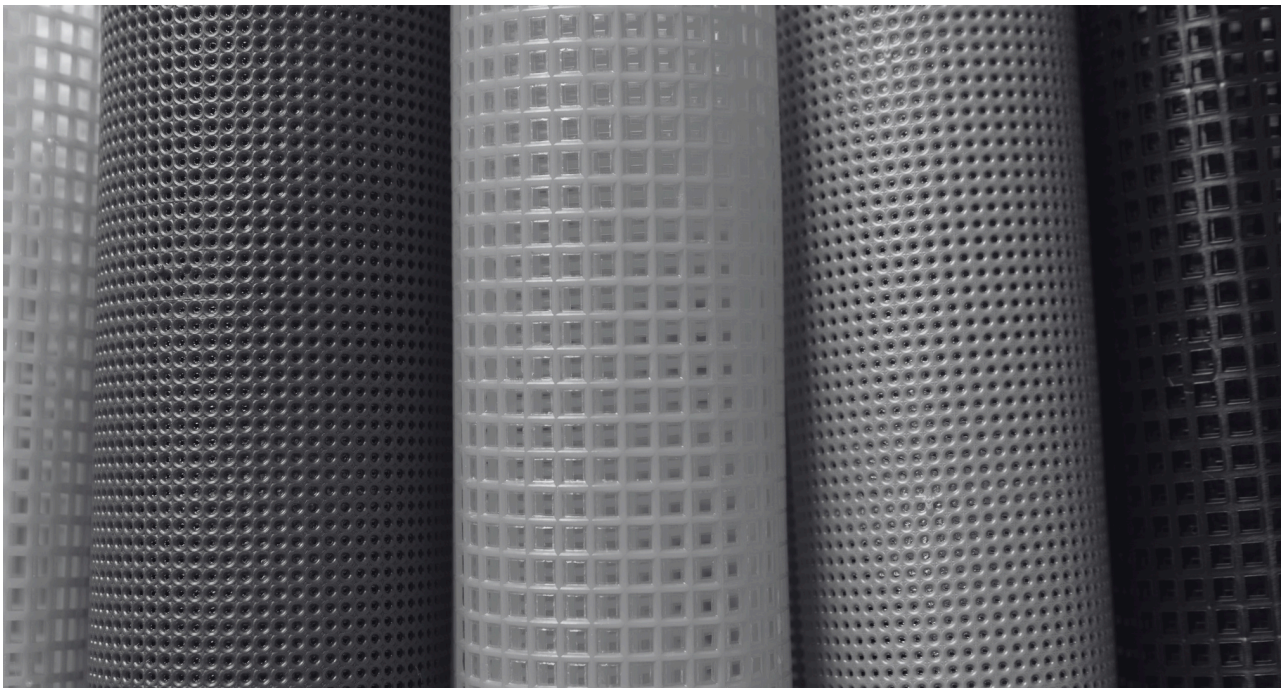

> PU ROUND AND PU V BELTS

These thermoplastic polyurethane and polyester v-belts and circular profile belts are manufactured to high-quality standards for various power transmission applications.

> TEFLON/PTFE BELTS

PTFE-coated fabric belts exhibit excellent non-stick and high-temperature properties (from -70°C to $+315^{\circ}\text{C}$). They are ideal for the food industry, packaging, heat-sealing, and industrial drying.

> GROOVED / SPROCKET DRIVEN ROLLERS

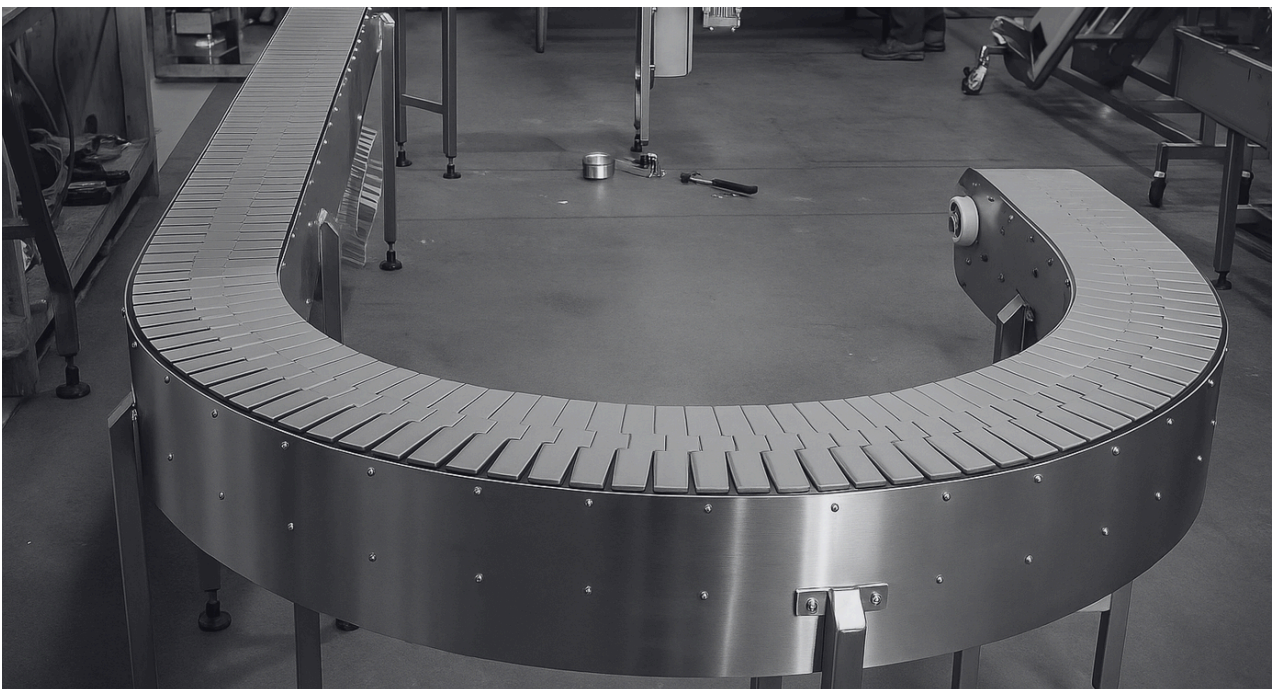

These are medium to heavy-duty power-driven rollers fitted with robust sprockets for chain-driven applications or grooves for belt-driven systems. They are ideal for applications requiring a positive, reliable drive.

> SLAT CHAINS

A durable conveyor chain with a flat top surface, providing a stable platform for products.

ETI Conveyor slat chains are manufactured with high-load standard chemical resistance and high-antistatic features. They provide a stable, flat surface for product handling, which is essential for the smooth and efficient flow of items. One of the main advantages is their ability to handle a wide range of product sizes and shapes, from small bottles to large boxes.
