ETI Automation

# INSPECTION MACHINE SOLUTIONS

High-Speed Precision. Zero  
Defects. Total Quality Control.

# ENGINEERED FOR EFFICIENCY. BUILT TO LAST.

---

With over 25 years of proven experience, ETI Automation is a trusted leader in designing, manufacturing, and integrating premier industrial automation and quality control systems.

We are your strategic partner, dedicated to solving the unique challenges of modern industry. Our solutions are engineered for maximum efficiency, reliability, and performance, trusted by over 65 companies around the world to ensure their products meet the highest quality standards.

## Key Pillars:

- ✔ **25+ Years of Expertise:** Proven industry leadership and technical knowledge.
- ✔ **Advanced Vision Technology:** Utilizing state-of-the-art cameras and sensors.
- ✔ **Custom Engineering:** Solutions designed specifically for your unique product and speed requirements.
- ✔ **Quality & Reliability:** Built to last, our systems ensure 100% quality assurance.

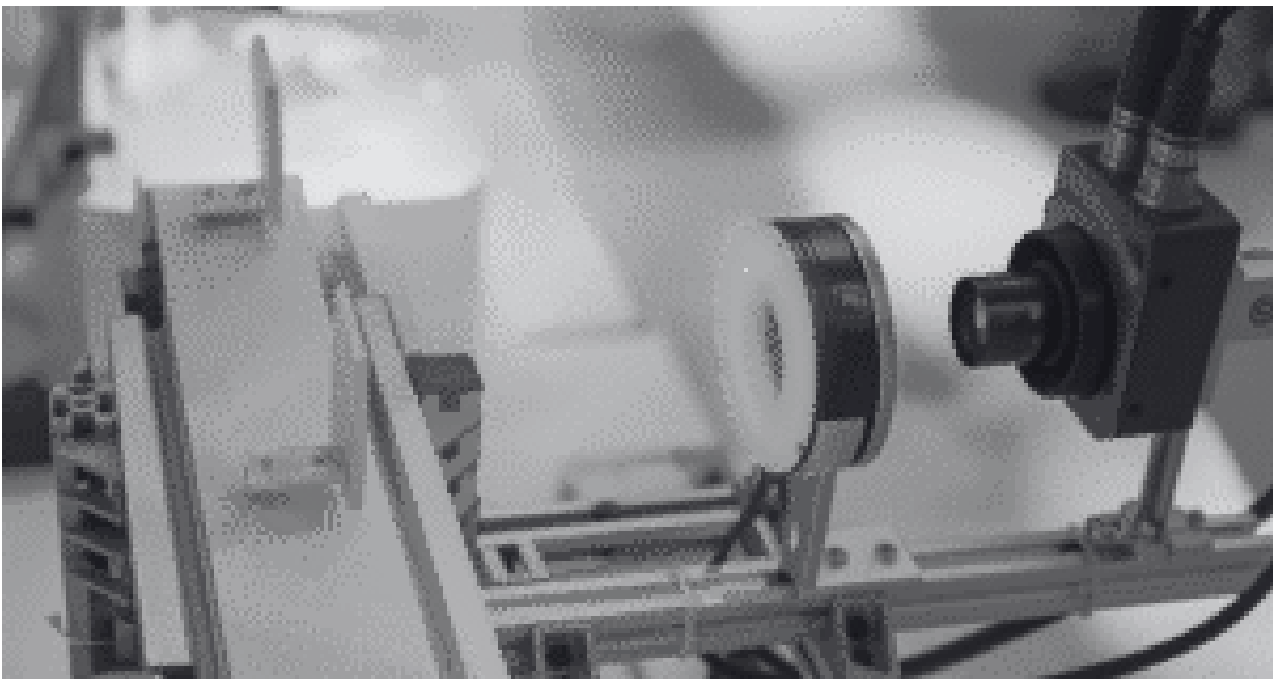

## ➤ INSPECTION MACHINE SOLUTION

Advanced, high-speed, and accurate vision systems for a zero-defect workflow.

---

ETI Automation's Inspection Machine Solutions provide an advanced, high-speed, and accurate way to inspect products for defects, ensuring 100% quality control.

Utilizing state-of-the-art vision systems, our machines can identify flaws in labeling, seals, components, and packaging at full production speeds. By automating the inspection process, we help you eliminate human error, reduce waste, and ensure that only perfect products reach your customers.

# ➤ KEY APPLICATIONS & TECHNOLOGIES

Comprehensive Vision & Traceability Solutions

---

## ✔ Feature 1: Barcode & 2D Code Verification

Ensure complete traceability by verifying 1D barcodes and 2D data matrix codes at high speeds. Our systems detect unreadable or incorrect codes instantly, preventing supply chain errors.

## ✔ Feature 2: High-Speed Tracking

Powered by Zebra FS40: Conquer high-speed tracking challenges with ETI Automation and the Zebra FS40 fixed industrial scanner. This partnership delivers superior decoding performance on fast-moving conveyor lines.

## ✔ Feature 3: Food & Beverage Traceability

Automate your traceability requirements. Our solutions ensure that every package is accounted for, labeled correctly, and meets safety standards, crucial for the food and beverage sectors.

## ✔ Feature 4: Automated Vision Quality Control

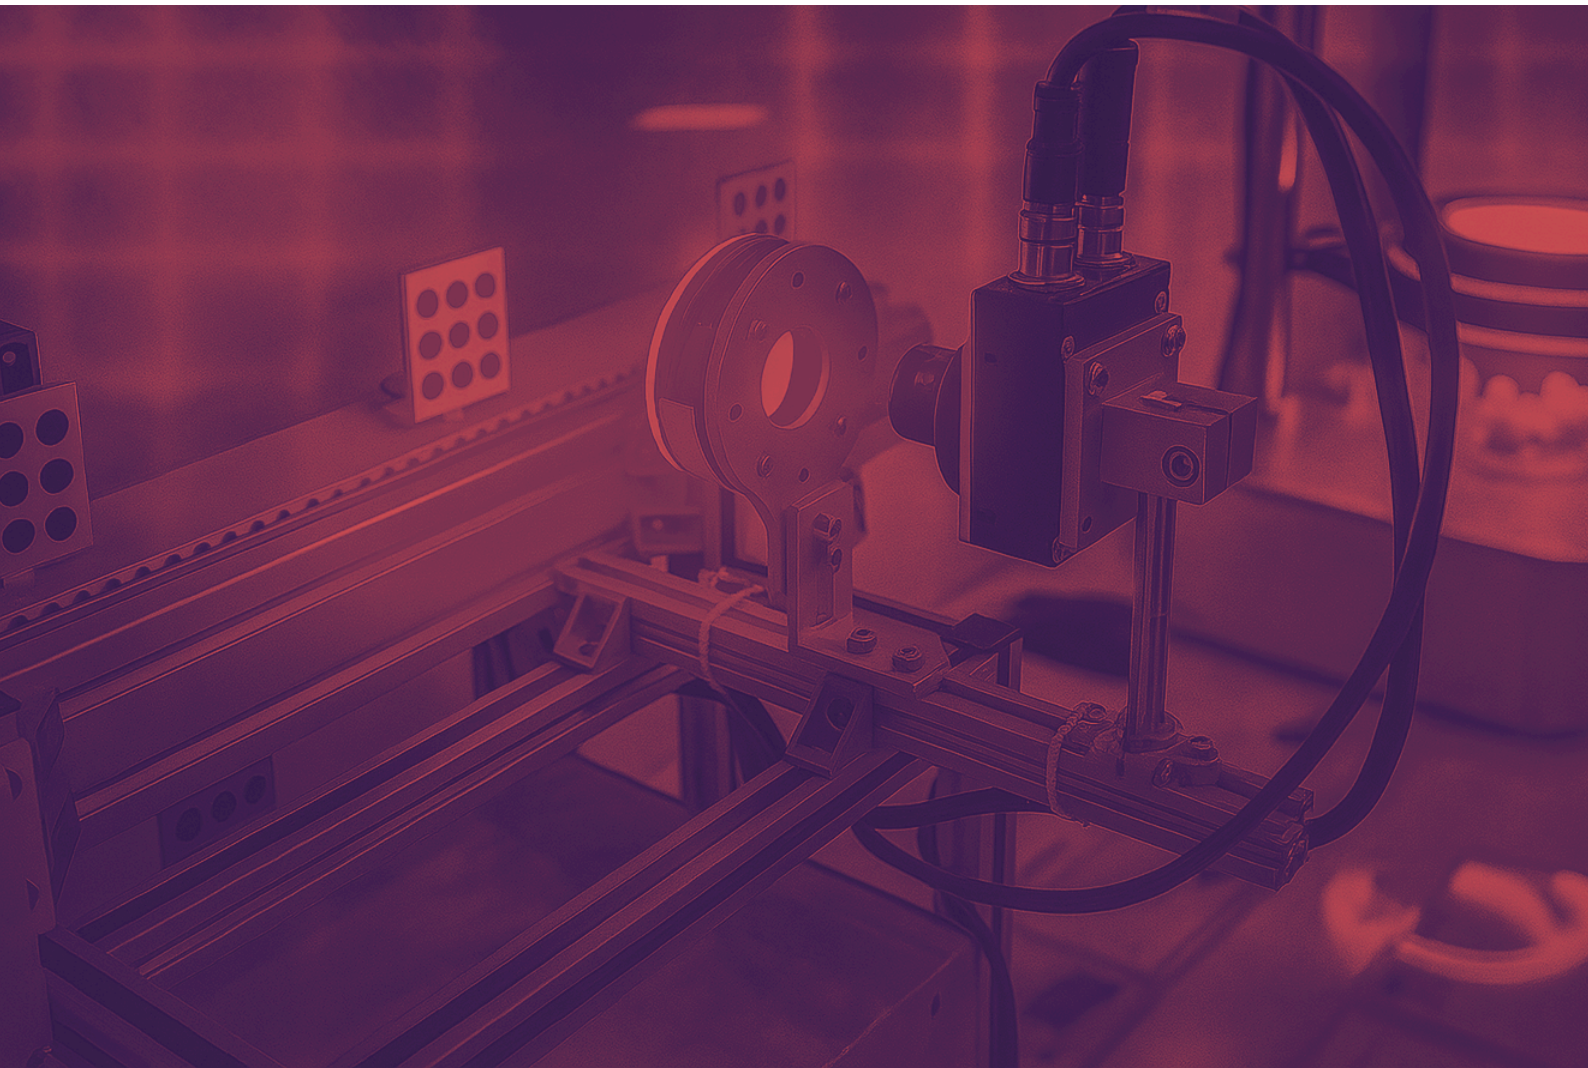

Beyond codes, our systems inspect for physical defects, cap alignment, fill levels, and label positioning, providing a complete solution for automated vision.
